**INTRODUCTION**

EEB project courses are designed for students with an adequate background in ecology, evolutionary biology, or behaviour. The normal expectation of a project course is that the student, aided and advised by the supervisor, will read relevant literature, and plan, execute, analyze and report on experimental or descriptive investigations on an appropriate topic. The project must be original work; a literature review alone is not acceptable.

**INSTRUCTIONS**

Students and supervisors are encouraged to review the EEB Research Project Course guidelines before completing the application and registration forms. You can find the guidelines at <https://eeb.utoronto.ca/education/undergraduate/research-courses>.

Submit this completed form by email to the EEB Undergrad Office at [undergrad.eeb@utoronto.ca](mailto:undergrad.eeb@utoronto.ca) and cc your Supervisor. Please name your file '397 - Last Name, First Name.' **You do not need to submit the additional documentation to the EEB Undergraduate Office.**

The EEB Undergraduate Office will enroll you in the Research Project Course on ACORN. You and your supervisor are responsible for completing the **EEB397Y1Y Registration Form** and submitting it by the deadline indicated on the form. You can find the Registration Form at <https://eeb.utoronto.ca/education/undergraduate/research-courses>.

**Note to students:** Written permission of your supervisor is required if you intend to publish any of the results from your independent research project.

**AGREEMENT BETWEEN SUPERVISOR AND STUDENT**
